Evening session – public

Bruce Jewell – welcome
History – see AM remarks
200-300 yrs modification & cut over land
to 200 million ac forest. Many years of agency
work on WS issues

Beverly → Looking forward to UFP in what it can
do to clean up streams and optimize
our resources by working together

Lisa McKinnley – evening lead facilitator

Angela Ga Forst Watch

Q/A - Presentation 26

How is different from what you already do?
What are we going to do different?

Actual effect or legal effect of MOU or Policy?
Will it be regulation?
Changes in conducting operations
Is agency participation voluntary?
Will there be a team to implement or carry out?
Different agency missions & funding levels
Intent of Fed agencies to implement policy
Will watershed assessments in R8 mesh with
UFP Policy and methods
Measure accountability - what is it

Group 1 Marjan Pettier EPA

Is this right approach?

Do we really need a policy to do this?
We are already trying to do much on this issue
Concern that this will complicate USFS mgmt
Thought waters were ID under Clean Water Act
Tired of Washington level direction
Is this meaningful at WS level because
public ownership is such a small percentage

USFS doing assessments
Will assessments be different
Will assessments be final
Will data base be common & build upon
and make accessable by public.
Would all Federal Programs be
subject to this program —
Normal funding expected or new funds?
Consequences - may effect private lands
Money and growth problems
How can we assess without pvt + State
Some say we need Fed intervention on WS
but no authority
Clarification of language as to ~~attent~~ intent
Point person w/each agency
High risk over overlap now without knowledge
of right hand knowing what left hand is
doing
Some room for uniqueness across country
& don't overwork at national standards
& leave some flexibility
Need time to implement this
TMDL stakeholders need to be ~~[illegible]~~ involved

CAET RECEIVED

26

MAR 14 2000

- Stakeholders will be private.
- Multiple State entities.
  - Who do we ask @ what we do on fed. lands.
- Policy "touchy-feely"
- Time debating vs. time doing
- Are we leaving out the local gov's. not.
- Sustainability drives involvement
- Use FCTs as implementation mechanisms.
- No committment relative to implementation Resources.
- Resource concerns for redirectio
- What level of participation is needed. Do we need all of us all the tim

- Measures of success? How do we measure performance?
- How will this tie into each agencies Goals/Objectives under GPRA.
- On the ground vs. at the Regional level agencies.
