1) How is it different from what is done now? (Coordination, Cooperation)
Is it the watershed approach?
A. Collaborate better to manage watersheds better than have been managed as a result of impacts through mitigation. This looks @ how land resources are used and manage that.
Focused resource use through collaboration

2) Effect [redacted] on legal status of MOU.
It would not be a regulation. A way to conduct business across agencies w/ cooperation
Agree on how to assessments take place. Harmonize agency efforts.

3) Voluntary agency participation? Collaborative process team to carry out UFP?
Agencies & depts. that agreed to this do not consider it voluntary

4) In South watershed Assessment is being developed by USFS how will this mesh with that?
A Landscape perspective will be the goal methodologies

Group #2

27

1) Does the Policy take the right approach?

Too Static — Look for long range solutions
not 3-4 yr but ↑ 2, 20 yr.

— More spec. imp. methods
designations of special watersheds

— Too general needs more specifics
~~Strategy but~~

— Goal is defined with no specificity or tactics.

— Early involvement is new to stakeholders

the organization — This effort looks like similar organizations ARC ≈ no power.

— Not voluntary

collaborate — Regional differences

watershed approach — Common or Standard approach to watershed ~~approach~~ assessment approach.
Terms + ~~[illegible]~~
Determine what the science of assessment means to stakeholders.

— Agency cooperation + collaboration

— Move ahead with Policy to get ahead of TMDL development

— TMDL + UFP are both watershed approach tool but are they the same type of tool.

- UFP Agencies might be able to influence Engage voluntary program for private lands. Agricultural issues must be addressed.
- ↑ information flow.
- what is the trigger
- inclusive & ~~explicit inclusion~~ of private land
- Measures of success
- measurement tools for progress
- City

2. How can restoration & protection activities on Fed. Lands be best coordinated?

Cooperative approach — collaborative consensus

Funding?

Utilization of existing funds?
New funding?

Maizon

Implementation

Integrate at the ground level the policy ~~to~~ to address problems ex roads, ATVs where are impared watershed

3. Collaboration

Conasoga NRCS relationship c

local land owners → locally

Prioritize Streams by impairment.

Paradigm →
