MAR 27 2000

Summary Thoughts from Discussion

Very strong Support for unified watershed.

Appreciation for Tribal outreach.

Strong Emphasis that real resources are needed to bring people to the table. Integration takes time - if we are going to do this we need adm. flexibility, reduction of status quo activities, recognition that different values need to be recognized & coordinated in practice

(NRCS Tribal Liasons were seen as good model of an agency commitment to learn how to partner)

Great concern that a "Unified Watershed Mgt." policy is one more program whose goal or intended impact is too narrow ie ..... Clean Water. The disciplines / impacts / agencies / are multiple.

Recognition that some group / agency / needs to build local capacity to involve citizens in making decisions / sustaining a structure to use the agency personnel as resources.
