

Is This Water Safe?

YES, *if you are informed.*

Through a partnership between **Riverkeeper, U.S. Geological Survey, National Park Service, Georgia Environmental Protection Division, The Georgia Conservancy and Trust for Public Land**, we have been studying water quality issues to determine whether it is safe to play in the Chattahoochee River.

Join us for a

Safe Water Seminar

on **Tuesday, October 22, 2002**

at **Roswell River Landing,**

Azalea Drive off Roswell Road

9AM-1PM

to discuss how and when to recreate safely in the Chattahoochee River National Recreation Area.

Keynote speaker: **Bob Zimmerman,**
Charles River Watershed Association in Boston.

Other speakers will include representatives from the U.S. EPA, National Park Service, Centers for Disease Control, U.S. Geological Survey, state agencies, and nonprofit organizations.

Free admission includes a picnic lunch by the River at Noon.

Don't forget to check bacteria levels before recreating on the Chattahoochee River

Real-time predictions of bacteria counts are available on the new BacteriALERT web page at <http://ga2.er.usgs.gov/bacteria/>
