ARPA MESSAGE HEADER

Part 3

I am all for cleaning up the rivers, lakes, and streams! We must leave a healthy environment for future generations. Please address antiquated combined sewer systems in cities, animal waste runoff, and farm chemical runoff as soon as possible!

I use several local rivers and resevoirs for recreation and drinking water. The cleaner the water is from chemicals and bacteria, the safer these streams, lakes, and rivers will be for recreation and drinking water purposes.

I greatly appreciate the major improvements made since the 60's(Original Clean Water Acts) but there is still a lot to do!

Thanks,  
Bob Gaesser
