

# CONTENTS

Abstract .....	1
Introduction .....	1
Geographical Distribution of Selected Trace Elements and Organic Compounds.....	8
Trace Elements .....	8
Organic Compounds.....	10
Factors Contributing to Distribution of Contamination .....	13
Point Sources.....	13
Non-Point Sources.....	13
Sediment Transport .....	16
Comparison of Point and Non-Point Source Contributions to Streambed-Sediment Concentrations .....	16
Persistence of Contaminants .....	16
Potential for Adverse Biological Effects .....	17
Trace Elements .....	17
Organic Compounds.....	19
Synergistic Effects of Contaminants .....	21
Bioaccumulation in Fish Tissue .....	21
Potential Human Health Impacts—Fish Consumption Advisories .....	22
Summary .....	23
References Cited .....	24

## FIGURES

1-4. Maps showing:	
1. Topographic shaded relief map of the Connecticut, Housatonic, and Thames River Basins .....	2
2. Generalized land use.....	3
3. Population density by town, 1990.....	5
4. Location of streambed-sediment sampling sites.....	6
5,6. Graphs showing:	
5. Geographic distribution of selected trace-element concentrations, 1992-94.....	9
6. Geographic distribution of selected organic-compound concentrations, 1992-94 .....	11
7-10. Maps showing:	
7. Geographic distribution of permitted surface-water dischargers with discharge volumes greater than 1 million gallons per day, 1992-94.....	14
8. Geographic distribution of PCB concentrations sorbed to bottom sediments and the location of major dams on the East Branch and mainstem Housatonic Rivers, 1992-94 .....	15
9. Potential frequency of adverse effects on benthic organisms relative to trace-element concentrations in streambed sediments, 1992-94 .....	18
10. Potential frequency of adverse effects on benthic organisms relative to organic-compound concentrations in streambed sediments, 1992-94 .....	20
11. Graph showing concentrations of total chlordane, total DDT, and total PCB of white suckers and streambed sediments sampled at the same location, 1992-94.....	22

## TABLES

1. Streambed-sediment sampling sites in the Connecticut, Housatonic, and Thames River Basins, 1992-94.....	7
2. Statistical summary of trace-element concentrations in streambed sediment in the Connecticut, Housatonic, and Thames River Basins, 1992-94.....	8
3. Statistical summary of organic-compound concentrations in streambed sediment in the Connecticut, Housatonic, and Thames River Basins, 1992-94.....	11
4. Streambed-sediment-quality guidelines and their relation to the potential frequency of adverse effects on benthic organisms .....	19

## CONVERSION FACTORS AND VERTICAL DATUM

### CONVERSION FACTORS

Multiply	By	To obtain
foot	0.3048	meter
mile	1.609	kilometer
square mile	12.590	square kilometer
Million gallons per day (Mgal/d)	0.04381	cubic meter per second

Temperature in degrees Celsius ( $^{\circ}\text{C}$ ) may be converted to degrees Fahrenheit ( $^{\circ}\text{F}$ ) as follows:

$$^{\circ}\text{F}=1.8^{\circ}\text{C}+32.$$

**Concentrations of chemical constituents** in water are given either in parts per million (ppm) or parts per billion (ppb).

### VERTICAL DATUM

**Sea level:** In this report, “sea level” refers to the National Geodetic Vertical Datum of 1929 (NGVD of 1929)—a geodetic datum derived from a general adjustment of the first-order level nets of the United States and Canada, formerly called Sea Level Datum of 1929.
