

## **Report for 2001GU1302B: Information Transfer**

There are no reported publications resulting from this project.

Report Follows:

## INFORMATION TRANSFER

WERI's mission involves a large information transfer-dissemination component. Key elements include written forms such as newsletters, brochures and pamphlets, a web site, technical reports, journal articles, newspaper columns, and book chapters. The audience for the results of USGS sponsored research is widely varied geographically and by education level. Projects included under information transfer this year included design, layout and printing of five technical completion reports resulting from USGS funded research projects. Seventy five (75) hard copies of each report will be printed and the reports were prepared in PDF file format and were published on WERI's Web page. It is very important that WERI's Web page be updated and optimized on a regular basis. A professional Web maintenance firm has been contracted to provide maintenance to the WERI Web page on a regular basis. Because of Guam's remote location it is difficult and quite costly for researchers to present their findings at technical conferences and symposiums. This project funded a portion of stateside travel expenses for any PI or his graduate student presenting a refereed professional paper summarizing all or a portion of current 104-B research.
