

Report for 2002AK4B: Molecular characterization of organic matter in soil leachates from the Caribou Poker Creeks Watershed

- Conference Proceedings:
 - Autier, V. D. White, and D. S. Garland, (2002), Seasonal variation of organic matter chemistry in a boreal watershed, 53rd Arctic Science Conference, American Association for the Advancement of Science, Fairbanks, Alaska.
 - Seelen, C., White, D.M., K. Yoshikawa, V. Autier, (2004), How chemical differences in soil leachates relate to groundcover, Proceedings of the 2004 Cold Regions Engineering and Construction Conference.
- Articles in Refereed Scientific Journals:
 - White, D., K. Yoshikawa, and D. Garland, (2002), Fingerprinting dissolved organic matter to support hydrologic investigations, *Cold Regions Science and Technology*, 35:27-33.
 - Autier, V. and D. M. White, (2004), Cd mobility in boreal soils, *Journal of Hazardous Materials*, 106(2/3):149-155.
- Dissertations:
 - Vincent Autier (2002), Predicting Contaminant Transport Pathways in the Caribou-Poker Creeks Watersheds. MS. Civil Engineering, Thesis, University of Alaska Fairbanks.
