

WATER RESOURCES RESEARCH GRANT PROPOSAL

Project ID: 2002AL1B

Title: Watershed Protection Through Building Material Substitution and Controlled Use

Project Type: Research

Focus Categories: Water Quality, Surface Water, Non Point Pollution

Keywords: Pollution Prevention, Storm Water Runoff, Watershed Protection, Building Materials

Start Date: 03/01/2002

End Date: 02/28/2003

Federal Funds: \$25,000

Non-Federal Matching Funds: \$54,342

Congressional District: Sixth

Principal Investigators:

Melinda Lalor

University of Alabama, Birmingham

Abstract

This research will identify and quantify selected toxicants that are added to urban stormwater through contact with a variety of building materials. This information, along with a cost analysis, will be used to analyze the potential pollution prevention benefits and economic impacts associated with building material substitutions in sensitive watersheds.
