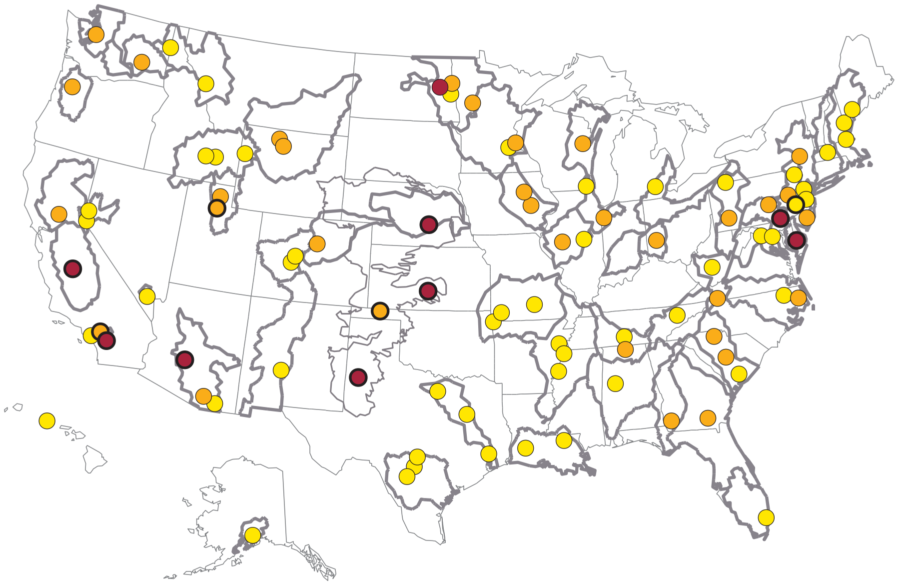
Oct 24 2002 NO3 data

A national ranking of NITRATE concentrations in major aquifers



Percentage of samples exceeding drinking-water standard for nitrate (10 milligrams per liter)--

Each circle represents a major aquifer

🔴 Greater than 14 percent
🟠 Less than 14 percent (but at least 1 sample)
🟡 0 samples exceed standard

Background concentration

○ Bold outline indicates median values
greater than background concentration
(2 milligrams per liter)
