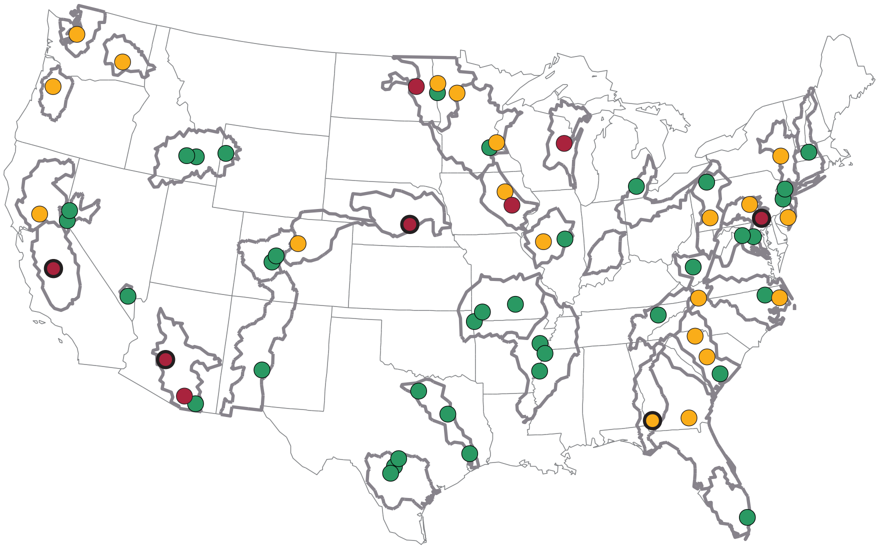
July 2000 NO3 data

A national ranking of NITRATE concentrations in major aquifers



Percentage of samples exceeding drinking-water standard for nitrate (10 milligrams per liter)--

Each circle represents a major aquifer

- 🟥 Greater than 10 percent
- 🟧 Less than 10 percent (but at least 1 sample)
- 🟩 0 samples exceed standard

Background concentration

○ Bold outline indicates median values greater than background concentration (2 milligrams per liter)
