

# SPARROW Model Estimates of Phosphorus Delivered to Streams and Coastal Areas in the Santee River Estuary and Charleston Harbor

Which areas contribute the largest amounts of total phosphorus annually:  
 to local streams?                      to the Santee River Estuary and Charleston Harbor?

What sources contribute the largest amounts of total phosphorus annually to the Santee River Estuary and Charleston Harbor?

(Note: Wastewater Discharge estimates include inputs to stream and shoreline reaches, not direct inputs to Estuary/Harbor)
