

SPARROW Model Estimates of Nitrogen Delivered to Streams in the Peace, Myakka, Manatee, Little Manatee, Alafia, Hillsborough, and Withlacoochee River Basins, and to Charlotte Harbor, Sarasota and Tampa Bays, and adjacent coastal areas

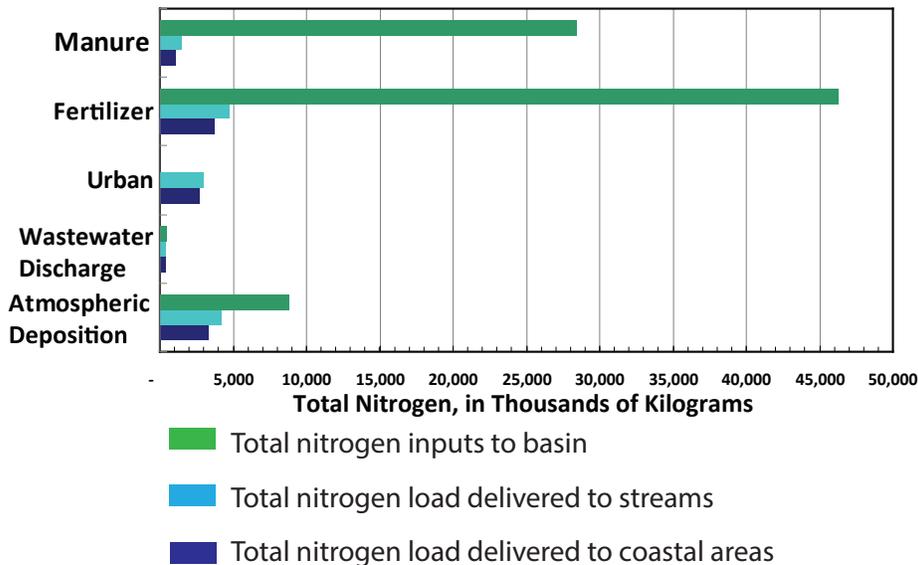

Which areas contribute the largest amounts of total nitrogen annually:

to local streams?

to Charlotte Harbor, Sarasota and Tampa Bays, and adjacent coastal areas?

What sources contribute the largest amounts of total nitrogen annually to Charlotte Harbor, Sarasota and Tampa Bays, and adjacent coastal areas?

(Note: Atmospheric Deposition is reported as inorganic nitrogen, Atmospheric Deposition and Wastewater Discharge estimates include inputs to stream and shoreline reaches, not direct inputs to coastal areas)
