PUBLICATIONS ON TECHNIQUES OF WATER-RESOURCES INVESTIGATIONS

The U.S. Geological Survey publishes a series of manuals describing procedures for planning and conducting specialized work in water-resources investigations. The material is grouped under major subject headings called books and is further divided into sections and chapters. For example, Section A of Book 9 (Handbooks for Water-Resources Investigations) pertains to collection of water-quality data. The chapter, which is the unit of publication, is limited to a narrow field of subject matter. This format permits flexibility in revision and publication as the need arises.

The Techniques of Water-Resources Investigations (TWRI) reports listed below are for sale by the U.S. Geological Survey, Branch of Information Services, Box 25286, Federal Center, Denver, CO 80225 (authorized agent of the Superintendent of Documents, Government Printing Office). Prepayment is required. Remittance should be sent by check or money order payable to the U.S. Geological Survey. Prices are not included because they are subject to change. Current prices can be obtained by writing to the above address. When ordering or inquiring about prices for any of these publications, please give the title, book number, chapter number, and “U.S. Geological Survey Techniques of Water-Resources Investigations.” An updated list of TWRI reports can be found by accessing the World Wide Web url: http://water.usgs.gov/lookup/getTWRI.

**Book 1. Collection of Water Data by Direct Measurement**

*Section D. Water Quality*

**Book 2. Collection of Environmental Data**

*Section D. Surface Geophysical Methods*

Section E. Subsurface Geophysical Methods

Section F. Drilling and Sampling Methods

Book 3. Applications of Hydraulics
Section A. Surface-Water Techniques

Section B. Ground-Water Techniques

Section C. Sedimentation and Erosion Techniques

Book 4. Hydrologic Analysis and Interpretation

Section A. Statistical Analysis

Section B. Surface Water

Section D. Interrelated Phases of the Hydrologic Cycle

Book 5. Laboratory Analysis

Section A. Water Analysis

Section C. Sediment Analysis

Book 6. Modeling Techniques

Section A. Ground Water

Book 7. Automated Data Processing and Computations

Section C. Computer Programs

Book 8. Instrumentation

Section A. Instruments for Measurement of Water Level

Section B. Instruments for Measurement of Discharge

Book 9. Handbooks for Water-Resources Investigations

Section A. National Field Manual for the Collection of Water-Quality Data
