Office of Water Quality Water-Quality Information Note 2005.08

Subject: Field Methods— New 1-liter GCC bottle (Q27FLD)

Beginning next week, the National Field Supply Service (NFSS) at the National Water Quality Laboratory (NWQL) will begin shipping a new 1-liter amber, baked, glass bottle (GCC) for One-Stop item number Q27FLD. This bottle is a true 1-liter bottle that is prepared by and purchased from EaglePicher Scientific Products. It replaces the 1-quart GCC bottles that were baked in-house at the Ocala Lab and, most recently, at the NWQL. The NWQL Organics Section conducted quality-assurance testing on this product prior to its acceptance and the Quality-Assurance Section will conduct appropriate quality assurance on all future lots.

The older-style GCC bottles may continue to be used until your local supply is exhausted.

Questions may be directed to the NFSS (nfss@usgs.gov).

If this Note was forwarded to you and you'd like to have your name placed on the WaQI Notes distribution, please send email to nlsnow@usgs.gov.

WaQI Notes are archived on the Office of Water Quality web site,
