Summary of the Yellowstone River Compact’s Apportionment Provisions

The Yellowstone River Compact dividing the waters of the tributaries (Clarks Fork, Big Horn, Tongue and Powder) of the Yellowstone among the States of Wyoming, Montana and North Dakota was negotiated in 1950, and ratified by the three States and the Federal government in 1951. This Compact included the following provisions for all four of the tributaries:

A. Existing rights as of January 1, 1950 maintain their status quo.
B. Existing and future domestic and stock water uses including stock water reservoirs up to a capacity of 20 acre-feet are exempted from provisions of the Compact.
C. Devices and facilities for the control and regulation of surface water are exempted from the provisions of the Compact.

The unappropriated or unused total divertible flow of each tributary, after needs for supplemental supply for existing rights are met, is allocated to Wyoming and Montana as follows:

Clarks Fork of the Yellowstone River:
- Wyoming 60%
- Montana 40%

Big Horn River (exclusive of Little Big Horn River)
- Wyoming 80%
- Montana 20%

Tongue River
- Wyoming 40%
- Montana 60%

Powder River (including the Little Powder River)
- Wyoming 42%
- Montana 58%

Lands in Montana and North Dakota below Intake, Montana are entitled to beneficial use of the flow of the Yellowstone River on a proportionate basis of acreage irrigated. The points of measurement and the gaging stations used to define the divertable flows are:
